Dagartech's environmental management system policy

Dagartech, a company specialised in developing energy solutions for industry, is committed to sustainability and the control of the environmental aspects of its activity.

Likewise, ongoing improvement, through the setting of objectives and the implementation of activities to achieve them, will be the key pillar on which our environmental policy will be based.

To this end, Dagartech Management undertakes to:

- **Environmental protection, including pollution prevention and assessment of potential risks:** identification, characterisation and improvement of the potential environmental impact arising from the environmental aspects related to the organisation's activities.
- **Integrate environmental management into the organisation's corporate policy,** taking into account environmental criteria in its processes, projects and activities, as well as in decision-making.
- **Comply with all legal and other requirements that apply to the organisation,** ensuring that all activities and products manufactured by Dagartech strictly comply with the applicable rules and regulations.
- **Promoting environmental training, awareness and education** among employees and collaborators. Encouraging initiatives that promote good practice and greater environmental responsibility.

(V.1).

 **Customer service hours:**
Monday to Thursday from 8 am to 5 pm.
Friday from 8 am to 3 pm.

- **Promote the dissemination of environmental aspects, objectives and actions** derived from the organisation's policy.
- **Promote the rational use of natural and energy resources**, as well as the reuse and minimisation of waste, dumping and environmental impacts that may be generated due to the organisation's activity.
- **Continuously improving our company and its environmental performance**, relying on our management system through its continuous evaluation and updating.
