Our Residential range is equipped with Honda iGX engines, specially designed for automatic generators

iGX series engines are equipped with an electronic control unit with STR engine control, which stabilizes the frequency by $\pm 1\%$ at constant load, monitors and controls engine speed, ignition time and oil level.

It also incorporates warning and automatic shutdown due to oil level and automatic handle decompression system, as well as automatic choke that ensures remote starts.

STR GOVERNOR

Electronically controlled

LESS NOISE AND VIBRATION
Reduction of noise levels up to -4dB(A)*

REDUCED FUEL CONSUMPTION
Fuel savings of 10 to 15%*

* Comparison made with the analogous model of the GX - Honda series.

And also...

The iGX series includes **automatic acceleration control**, which facilitates the use of the engine and prevents power and frequency drops.

As a result, engine vibrations are minimised, resulting in a longer life for the generating set.
